Subject: FW: Wash Water Scrubbers - EGCSA - Scrubbers regulation Map Italy (Livorno and Piombino Ports)

Dear Sirs,

Attached the latest revision of the Italian Ministry of Transport Circular Notice on the subject, applied in Livorno and Piombino by local Maritime Authorities (Harbour Master offices). This refers to MARPOL 73/78 – Annex VI, Regulation 4 – Instructions and guidelines for inspections on board of ships equipped with Exhaust Gas Cleaning Systems (EGCS)

As of today's date in Livorno and Piombino there are no specific restrictions to the use of "open-loop scrubbers", as an alternative to closed-loop or hybrid systems.

Kind regards.

VINCENZINI - BATINI
