Subject: FW: Overview of scrubber operations in Baltic ports

Hi

This is the reply I have received from Estonian Maritime Administration wrgds to the scrubber operations in the territorial waters.

Kind regards,

Subject: RE: Overview of scrubber operations in Baltic ports

Dear

Thank You for the inquiry. Estonian Maritime Administration will make public the official information concerning EGCS (Exhaust Gas Cleaning System) operations in territorial waters and ports of Estonia in due time. With the regulation no. 73 by Minister of Environment Annex 9 the open-loop EGCS is not prohibited if the systems comply with resolution MEPC.184(59) and other appropriate international regulatory requirements including MARPOL Annex VI. Also it is important that the port authorities will issue approval of using open-loop EGCS in the port area.

Best Regards,

Maritime Administration

Subject: Overview of scrubber operations in Baltic ports

Good afternoon,

I am contacting you on behalf of the company I work for, Scrubber manufacturer because we need your official response with regards to rules and legislation for the

stance on EGCS operations in territorial waters, ports and harbours. Please let me know if you are the Authority I can get these information from and if not please let me know whom I can contact further.

Thank you very much in advance!

Med vennlig hilsen / Best regards

Project Engineer
